No. PX4023

GUARANTEED FOR LIFE...

The customary method of building drum shells and hoops utilizes pre-fabricated bent panel single lap construction. But Gretsch's exclusive custom-built method means molded lamination! Here's the difference: ply-by-ply construction, built up in final form, with three individual laps staggered 120 degrees throughout the perimeter, then molded to perfect round by heat and tremendous pressure. Here's the result: the lightest, strongest, most perfectly shaped shells and hoops in the world! Guaranteed to hold perfect round—throughout the life of the instrument.

Insist on this Guarantee When You Buy!

GENUINE AJAHA TURKISH-TYPE CYMBALS

For more than thirty-seven years American drummers have ranked AJAHA Cymbals as second only to the famous K. Zildjian in quality. These brilliant, powerful Turkish-type cymbals bring the drummer extraordinary tone quality at minimum prices.

AJAHA "PAPER THIN"

High-pitched and instant in response they are excellent for brilliant stick work and quick "cut-offs".

- No. X4730-Size, 10" thin Ea. \$9.60
- No. X4731-Size, 11" thin Ea. 10.80
- No. X4732-Size, 12" thin Ea. 12.50
- No. X4733-Size, 13" thin Ea. 15.00

AJAHA "MEDIUM WEIGHT"

Lower in pitch than the "paper-thin" grade, these are fine for open "crash", and useful for stick work too. Every drummer needs a couple in this weight.

- No. X4738-Size, 12" med. Ea. \$12.50
- No. X4739-Size, 13" med. Ea. 15.00
- No. X4740-Size, 14" med. Ea. 21.00
- No. X4741-Size, 15" med. Ea. 25.00

AJAHA "HEAVY WEIGHT"

Splendid for band, symphony and drum corps use; brilliant, piercing tone.

- No. X4746-Size, 13" heavy Ea. \$15.00
- No. X4747-Size, 14" heavy Ea. 21.00
- No. X4748-Size, 15" heavy Ea. 25.00

No. PX4570

No. PX4587
