

the birth of the new

PREMIER SERIES

New for 2003 is the Premier Series. Engineered and hand crafted in Leicestershire, England, the Premier Series guarantees artists outstanding acoustic performance whether on the stage or in the studio.

Premier's sound and design engineers have worked closely with artists to develop the concept behind the new Premier Series. Having retained and redeveloped some of the best features of the former Signia, Signia Marquis and Genista ranges, the Premier Series showcases new shells and hardware designs which together create a responsive streamlined design that is durable enough to cope with even the most extreme demands placed upon it.

Recognising that artist's kits should be as individual as their music, the look and feel of the custom built Premier Series guarantees you will stand out from the crowd. Available in five shell variations and a possible 29 finish combinations, since the series was launched, world renowned musicians including Paul Doucette (Matchbox Twenty), Chris Sharrock (Robbie Williams), Steve White (Paul Weller), Alan White (Oasis) and Gene Lake (David Sanborn), have been keen to swap their former kits in favour of the contemporary design and precise sounds for which the Premier Series is already well known.
